Calculus BLUE Multivariable Volume 1: Vectors & Matrices (Primary Calculus Book 9)

Robert Ghrist

Calculus BLUE Multivariable Volume 1: Vectors & Matrices (Primary Calculus Book 9) Robert Ghrist
Finally, a math book that looks GREAT on a phone/tablet screen!

This volume is the first in a 4-volume set of CALCULUS BLUE books on multivariable calculus. It follows the (to be released) CALCULUS RED [introductory] and CALCULUS GREEN [single variable] sets. The resulting color-coded PRIMARY CALCULUS is a revolutionary series of graphical Mathematics texts optimized for reading on phone/tablet/kindle devices.

Calculus BLUE Multivariable Volume 1: Vectors & Matrices introduces vector and matrix algebra in the context of preparing for multivariable calculus. Topics covered in this text include:

- * curves and surfaces
- * vectors and coordinates
- * matrices and matrix algebra
- * matrix equations and linear systems
- * row reduction and inverse matrix computation
- * coordinate changes and bases
- * determinants and their interpretation and computation
- * a preview of linear algebra and matrices of partial derivatives

Throughout, the text is filled with contemporary applications to robotics, data, mechanics, economics, probability, networks, and biology. Theory and application are brought to life in full eye-scorching color (though a lot of it is blue).

This volume consists of 17 chapters (plus a prologue, epilogue, and foreshadowing of volume 2), each containing exercises for practice, for a total of 375 pages of mathematics and color and joy and sweat.

NOTE! This is graphics intensive, and the file size is quite large. You may want to download it over a wireless connection rather than cellular. Also, although Amazon says this is a "print replica", there is no printed text this is based on. This book was hand-crafted for electronic format. It looks phenomenal on a modern smart-phone. You can pinch-zoom, use bookmarks, and more. Enjoy!

From reader reviews:

Joseph Asher:

In this 21st millennium, people become competitive in every way. By being competitive at this point, people have to do something to make these people survive, being in the middle of typically the crowded place and notice by surrounding. One thing that often many people have underestimated the idea for a while is reading. Sure, by reading an e-book your ability to survive rises then having a chance to stay than other is high. For you personally who want to start reading any book, we give you this specific Calculus BLUE Multivariable Volume 1: Vectors & Matrices (Primary Calculus Book 9) book as a starter and daily reading guide. Why, because this book is usually more than just a book.

Jacki Peters:

Often the book Calculus BLUE Multivariable Volume 1: Vectors & Matrices (Primary Calculus Book 9) has a lot of knowledge on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. The writer makes some research just before writing this book. That book is very easy to read you will get the point easily after reading this book.

Kelly Cruz:

Are you kind of a stressful person, only have 10 as well as 15 minutes in your moment to upgrading your mind skill or thinking skill actually analytical thinking? Then you are having a problem with the book as compared to can satisfy your short time to read it because all of this time you only find a guide that needs more time to be studied. Calculus BLUE Multivariable Volume 1: Vectors & Matrices (Primary Calculus Book 9) can be your answer given it can be read by an individual who has those short free time problems.

Michael Nunn:

Guide is one of the sources of information. We can add our information from it. Not only for students but additionally natives or citizens require books to know the updated information of year for you to year. As we know those ebooks have many advantages. Besides we all add our knowledge, they may also bring us to around the world. By the book Calculus BLUE Multivariable Volume 1: Vectors & Matrices (Primary Calculus Book 9) we can have more advantage. Don't one to be a creative person? To become a creative person must choose to read a book. Just choose the best book that is ideal with your aim. Don't become doubtful to change your life at this book Calculus BLUE Multivariable Volume 1: Vectors & Matrices (Primary Calculus Book 9). You can be more attractive than now.
