Nanotechnology and Global Sustainability (Perspectives in Nanotechnology)

Nanotechnology and Global Sustainability (Perspectives in Nanotechnology)

The rise of collaborative consumption, peer-to-peer systems, and not-for-profit social enterprise heralds the emergence of a new era of human collectivity. Increasingly, this consolidation stems from an understanding that big-banner issues—such as climate change—are not the root causes of our present global predicament. There is a growing and collective view that issues such as this are actually symptoms of a much more vicious, seemingly insurmountable condition: our addiction to economic, consumption, and population growth in a world of finite resources.

Nanotechnology and Global Sustainability uses nanotechnology—the product of applied scientific knowledge to control and utilize matter at atomic and molecular scales—as a lens through which to explore the interrelationship between innovation, politics, economy, and sustainability. This groundbreaking book addresses how stakeholders can actively reshape agendas to create positive and sustainable futures through this latest controversial, cross-sectoral technology. It moves beyond issues of efficiency, productivity, and utility, exploring the insights of 22 contributors from around the world, whose work spans the disciplines of science and the humanities. Their combined knowledge, reinforced with various case studies, introduces an exciting prospect—how we can innovate without economic growth.

This new volume in the *Perspectives in Nanotechnology* series is edited by Dr. Donald Maclurcan and Dr. Natalia Radywyl. Dr. Maclurcan is a social innovator and Honorary Research Fellow with the Institute for Nanoscale Technology at the University of Technology Sydney, Australia. Dr. Radywyl is a social researcher and Honorary Research Fellow in the School of Culture and Communication at the University of Melbourne, Australia. She is also an Adjunct Research Fellow in the Faculty of Life and Social Sciences at Swinburne University of Technology, Melbourne. This book is written for a wide audience and will be of particular interest to activists, scholars, policy makers, scientists, business professionals, and others who seek an understanding of how we might justly transition to sustainable societies.

From reader reviews:

Scott Seward:

The book Nanotechnology and Global Sustainability (Perspectives in Nanotechnology) make you feel enjoy for your spare time. You should use to make your capable a lot more increase. Book can to become your best friend when you getting stress or having big problem with the subject. If you can make examining a book Nanotechnology and Global Sustainability (Perspectives in Nanotechnology) being your habit, you can get more advantages, like add your capable, increase your knowledge about some or all subjects. You could know everything if you like open up and read a reserve Nanotechnology and Global Sustainability (Perspectives in Nanotechnology). Kinds of book are several. It means that, science guide or encyclopedia or other individuals. So , how do you think about this e-book?

Ilene Cody:

The reserve with title Nanotechnology and Global Sustainability (Perspectives in Nanotechnology) includes a lot of information that you can find out it. You can get a lot of gain after read this book. This book exist new information the information that exist in this publication represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you within new era of the syndication. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Brian Scheele:

On this era which is the greater individual or who has ability in doing something more are more special than other. Do you want to become among it? It is just simple method to have that. What you have to do is just spending your time almost no but quite enough to possess a look at some books. On the list of books in the top checklist in your reading list is definitely Nanotechnology and Global Sustainability (Perspectives in Nanotechnology). This book which can be qualified as The Hungry Inclines can get you closer in turning into precious person. By looking upward and review this reserve you can get many advantages.

Amy Joshi:

As a pupil exactly feel bored to help reading. If their teacher expected them to go to the library as well as to make summary for some e-book, they are complained. Just small students that has reading's soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to there but nothing reading seriously. Any students feel that reading through is not important, boring along with can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Nanotechnology and Global Sustainability (Perspectives in Nanotechnology) can make you sense more interested to read.
