## International Perspectives on Industrial Ecology (Studies on the Social Dimensions of Industrial Ecology series) Pauline Deutz, Donald Lyons, Jun Bi

*'The significance of industrial ecology's geographic context of has for too long been neglected. This book makes a timely and pivotal contribution to the field by presenting analysis of an impressive range of case studies from across the world. Authors are highly familiar with their case study locations, which are analysed through a range of theoretical perspectives. International setting emerges as a significant contextual factor with which industrial ecology activity is inextricably linked.'*

- Alfred Posch, University of Graz, Austria

*'This book covers updated perspectives on eco-industrial parks across the world. It is an excellent work done by researchers from different backgrounds and cultures. History, barriers, institutional arrangements, policies, waste management, and greenhouse gas emissions, together with eco-industrial parks, are all discussed so that decision makers from different countries can understand the potential benefits of developing eco-industrial parks by considering their own realities. Specifically, case studies from both developing and developed countries are presented so that variations between different countries can be identified. Readers can enhance their knowledge on eco-industrial development, a useful tool for responding to challenges related to current resource depletion, environmental emissions and climate change issues.'*

- Geng Yong, Shanghai Jiaotong University, PR China

With its high-level focus on industrial ecology-related policies such as circular economy and industrial symbiosis, this book provides a timely analysis of the industrial ecology experience worldwide. Editors Pauline Deutz, Donald I. Lyons, and Jun Bi combine their diverse experiences in both research and teaching to examine the topic as a business, community, and academic endeavor in different settings worldwide.

*International Perspectives on Industrial Ecology* provides a cuttingedge, in-depth exploration of the commonalities and differences of industrial ecology experiences, comparing geographical contexts from each of the world's continents. Expert contributors utilize case studies and contextualized reviews of current projects to formulate invaluable insights in the field. Much attention is given to industrial symbiosis, waste management, circular economy, sustainable development, and environmental management as each pertains to the field.

This book's international perspective makes it ideal background reading for academics working in industrial ecology, as well as a valuable reference for postgraduates doing research or taking courses in the field. Public or private sector bodies trying to facilitate industrial symbiosis, economic development agencies considering industrial symbiosis projects, and environmental managers and regulators trying to improve environmental performance in their particular country will also find it engaging and relevant.
