Haunting the Knowledge Economy (International Library of Sociology) Jane Kenway, Elizabeth Bullen, Johannah Fahey, Simon Robb

This highly original book provides an engaging and critical introduction to the knowledge economy. The knowledge economy is a potent force pervading global and national policy circles. Yet few people outside the field of economics understand its central ideas and practices. This book makes these accessible. But it does much more.

It provokes 'conversations' between the knowledge economy and those marginalized economies that haunt it: the risk, gift, libidinal and survival economies. These illuminate the knowledge economy's shortcomings and point to alternative possible systems of exchange and sets of values. This multi-disciplinary study takes the knowledge economy out of the hands of the economists and brings it into creative tension with the ideas of key thinkers from sociology, anthropology, philosophy and ecology.

Illustrating the benefits of conversing with the ghosts of alternative economies, this provocative book will unsettle the way in which the knowledge economy is understood.

Groundbreaking and globally applicable, it has been authored by internationally respected authors and its conceptual breadth pertains to a range of disciplines and gives it its wide appeal.
