**Cosmology On Trial: Cracking The Cosmic Code** Pierre St. Clair

## EXPLORING PROBLEMS WITH ORIGIN OF THE UNIVERSE THEORIES

What if you knew the answers to most cosmological problems that theoretical physicists keep from the public?

What if you could impress your colleagues, teachers, friends with your cutting edge analysis?

**Amazon Bestselling author, Pierre St. Clair**, examines present theories of the universe like an attorney in a court of law.

**Cosmology on Trial** presents the remarkable findings of his study and introduces readers to unexplained and unsolved mysteries of the universe, without complex jargon.

The author's approach is, "Just the facts, please. Show me the evidence."

Based on survey research, interviews, and papers by the luminaries in astrophysics - including Stephen Hawking, Paul Davies, Max Tegmark, Brian Green, Edwin Hubble, and Alex Filippenko - St. Clair answers the question: is Big Bang cosmology a true account or a cover up of unsolved anomalies in order to preserve the status quo?

## SCIENTIFIC JOURNALS REVEAL MAJOR DISAGREEMENTS ABOUT THE UNIVERSE

**A ring of nine cataclysmic gamma ray bursts (GRBs) five billion light years across challenges current theories about the universe\***

On August 4, 2015, **Professor Lajos Balasz** announced to the press, "this structure contradicts the current models of the universe."

Balasz's investigating team at the Konkoly Observatory in Budapest is trying to establish if known processes of galaxy formation formed the ring's structure.

If not, present theories of the evolution of the universe will need a radical revision.

\*Published in the Monthly Notices of the Royal Astronomical Society.

**The May/2014 issue of Scientific American highlighted another major calamity**

\* theorists working in particle physics admit they're in a state of "confusion"

\* there is "widespread panic" that particle physicists may be barking up the wrong tree

\* to resolve the "crisis in physics" science periodicals, forums, and blog posts suggest revising fundamental principles

"Theoretical physics is at a crossroads right now...In a sense we've entered a very deep crisis."

**Dr. Neil Turok** - Director of the Perimeter Institute for Theoretical Physics

Renowned physicist, **Dr. Lee Smolin**, is pushing for a new paradigm in astrophysics:

"We need to make a clean break and embark on a search for a new kind of theory that can be applied to the whole universe - a theory that avoids the confusions and paradoxes, answers the unanswerable questions, and generates genuine physical predictions for cosmological observations."

Newtonian physics, General Relativity, Quantum Mechanics, and String Theory have still not proven whether gravity is a wave, a graviton particle, or even a fabric of spacetime.

The Standard Model of physics doesn't even include gravity, dark matter, dark energy, or consciousness.

**Author Pierre St Clair digs behind the headlines to update the public about the current crisis**

- The most important initiative which physicists ignore
- The five biggest myths of cosmology not supported by observation or data
- NASA physicists admit 96% of the matter and energy in the universe is unknown
- Science only understands 4% of the universe?

"As a scientist, and as an educator, I like the idea that we believe things because there's evidence."

**Dr. Richard Dawkins** - Oxford University Professor/Bestselling Author

### **From reader reviews:**

#### **Amber Orlowski:**

Have you spare time for any day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a stroll, shopping, or went to the Mall. How about open as well as read a book entitled Cosmology On Trial: Cracking The Cosmic Code? Maybe it is to become best activity for you. You know beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have other opinion?

#### **Robert Johnson:**

Book will be written, printed, or highlighted for everything. You can understand everything you want by a reserve. Book has a different type. We all know that that book is important factor to bring us around the world. Adjacent to that you can your reading ability was fluently. A book Cosmology On Trial: Cracking The Cosmic Code will make you to end up being smarter. You can feel far more confidence if you can know about every thing. But some of you think which open or reading the book make you bored. It isn't make you fun. Why they could be thought like that? Have you trying to find best book or acceptable book with you?

#### **Barbara Roundtree:**

The knowledge that you get from Cosmology On Trial: Cracking The Cosmic Code may be the more deep you rooting the information that hide within the words the more you get interested in reading it. It doesn't mean that this book is hard to know but Cosmology On Trial: Cracking The Cosmic Code giving you joy feeling of reading. The article author conveys their point in selected way that can be understood through anyone who read it because the author of this e-book is well-known enough. This specific book also makes your current vocabulary increase well. So it is easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having this kind of Cosmology On Trial: Cracking The Cosmic Code instantly.

#### **Joseph Gabriel:**

Do you have something that that suits you such as book? The e-book lovers usually prefer to decide on book like comic, brief story and the biggest some may be novel. Now, why not trying Cosmology On Trial: Cracking The Cosmic Code that give your entertainment preference will be satisfied by simply reading this book. Reading habit all over the world can be said as the means for people to know world far better then how they react in the direction of the world. It can't be stated constantly that reading routine only for the geeky particular person but for all of you who wants to possibly be success person. So , for all of you who want to start reading as your good habit, you are able to pick Cosmology On Trial: Cracking The Cosmic Code become your own starter.
