Weathering and Landscape Evolution: Proceedings of the 35th Binghamton Symposium in Geomorphology, held 1-3 October, 2004

In recognition of the fundamental control exerted by weathering on landscape evolution and topographic development, the 35th Binghamton Geomorphology Symposium was convened under the theme of Weathering and Landscape Evolution. The papers and posters presented at the conference imparted the state-of-the-art in weathering geomorphology, tackled the issue of scale linkage in geomorphic studies and offered a vehicle for interdisciplinary communication on research into weathering and landscape evolution. The papers included in this book are encapsulated here under the general themes of weathering mantles, weathering and relative dating, weathering and denudation, weathering processes and controls and the 'big picture'.

- * Contains 15 papers on the techniques and methodologies of research
- * Provides an up-to-date overview of various aspects of weathering and landscape evolution complemented by a number of excellent case studies
- * Contains a wealth of basic field data and relevant information
