Relations of Global Power: Neoliberal Order and Disorder Gary Teeple, Stephen McBride

This collection of original articles offers an up-to-date, critical review of the global political economy today, covering such topics as international finance, corporate governance, military power, international labour standards, global health, human rights, and more. Assembling a group of top scholars, the editors are able to provide a wide-ranging yet coherent survey of contemporary international institutions and how they are governed. In the process, they offer a useful basis for understanding the financial crisis of 2008.

Relations of Global Power is the only book available that examines the many different dimensions of the international regulatory structure across a range of issues, placing them all within the context of neoliberal globalization. It will be of interest to scholars of political science, sociology, policy studies, public administration, and global studies, and will also appeal to activists and members of alter-globalization movements.
